TYFO® RR

New Architecture in Concrete

Create beauty in your life with fine artistic surfaces

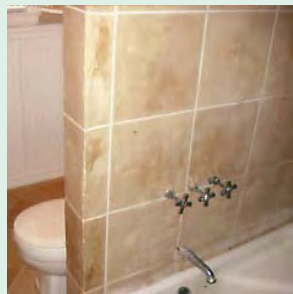

TYFO® RR

New Architecture in Concrete

‘Open A Whole New World of Possibilities.’

Aesthetic, well designed surroundings undoubtedly make a favourable impression on visitors to areas such as shopping centres, hotels, airport terminals, showrooms and retail outlets. One of the most effective ways of transforming even the most mundane of buildings into a highly attractive, welcoming environment is to install a decorative wall and flooring system. Not only will it bring quality and prestige to the structure, it will also offer maximum return on your investment by

on your investment by extending maintenance cycles far beyond the capability of most other wall and flooring systems.

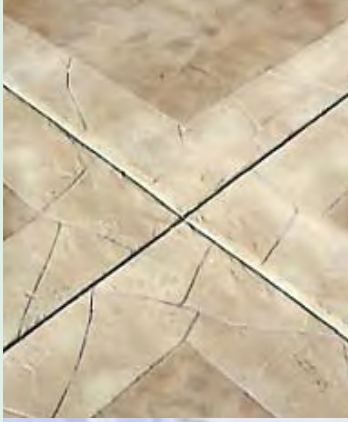

TYFO® RR is designed with flexibility in mind and afford the specifier the opportunity to create a complete visual transformation in building aesthetics. It has been used in many projects as wall and floor finishes. The Architect or owner can select the desired

finish appearance. All finishes are available in a wide range of colours.

TYFO® RR is a natural stonewith a unique high-tech acrylic binder coat material. It can be terracotta, limestone or sandstone and brings a whole host of unique advantages, aesthetically, spatially and practically.

Aesthetically it allows the specifier new means of expression and creativity. The wide ranges of decorative finishes bring colour texture and form to any building whether it is new or old. Spatially the TYFO® RR is so thin that when applied to the wall, it saves the internal space within the building.

Practically the TYFO® RR is quick and easy to install and as it is flexible and can be applied to multiple different building types and shapes including curved and linear buildings.

TYFO® RR can be easily applied by trowel or hopper spray gun to create a real textured look and feel in one easy application. An economical way to create stone paving and wall finishes, it is tough, hardwearing, weatherproof, flexible, cool to walk on and never needs painting. Brighten your home with TYFO® RR, both on the inside and exterior. Rejuvenate your garden ornaments, pots and planters. Restore life to that old wall, garden furniture, concrete or timber.

You can design your own paving style for that entertaining area or swimming pool surround. Give that feature wall a lift with long lasting effects. TYFO® RR is safe and a simple alternative for that professional look. TYFO® RR is water based, environmentally friendly and easy to apply.

TYFO® RR...

Remains cool... will not burn your feet

Looks great... adds that touch of class

Colourfast... will not fade. No artificial colours or oxides are used in the manufacturing process

Thin... nothing worse when you can't change the surface levels

Long lasting... extremely durable and hardwearing

Flexible... unlike concrete based products, it will not crack

Slip resistant... excellent grip under foot (feels like walking on hard sane)

Versatile... can be used almost anywhere and on anything

Quick... application quick therefore causes minimal disruption

Environmentally friendly... no harmful by products

Water based... No toxic fumes or nasty smells

Can be applied over ANY surface... we still haven't found a surface that it won't adhere to

TYFO® RR Terracotta

Real terracotta clay that you simply brush, roll or spray onto floors, walls, pool surrounds, patios, drives, pots -virtually any surface. Creating your own tile patterns is easy. Beautify your home inside and out - and add value too.

Let your imagination run wild. Spectacular effects are easy with water based TYFO® RR Terracotta. Create your own effects - be it dappled or aged.

Smart colour ideas are a breeze. Mix any colour you can imagine. Use contrasting colours on walls - vibrant, elegant, and luxurious.

Seal heavy traffic areas like paths, drives and floors with TYFO® Satin Sealer - for durability and the vibrant beauty of TYFO® RR Terracotta. TYFO® Sealers are water based and give heavy duty protection against wear and permanent staining. They are not affected by salt or chlorine water.

Imagine a multitude of colours with that genuine terracotta look. This real "earthy clay coating" will give a wide variety of terracotta shades. Make that feature wall desirable with a distinct terracotta feel, coloured to suit your individual taste and decor.

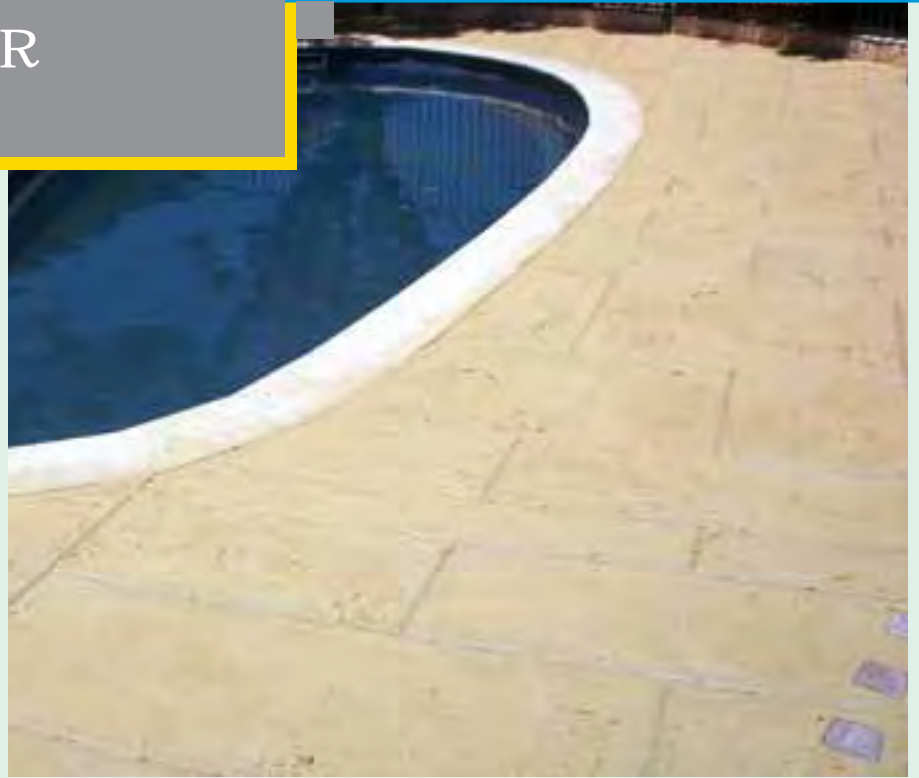

Before and after applying TYFO® RR

Some of the Colours and Shades of TYFO® RR

TYFO® RR Limestone

TYFO® RR Limestone is a Long Lasting Selection of unique aggregates, sand and special acrylic binders which can be used to create real stone finishes on floors, walls, timber or any desired surface.

Different effects and finishes can be created with just a little bit of imagination. Have a makeover for your old wall, pool surrounds, pathway or driveway from grey concrete to TYFO® RR Limestone with coloured looks or patterned finishes.

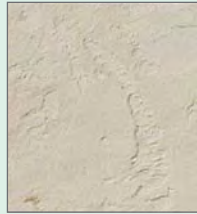

TYFO® RR Sandstone

TYFO® RR Sandstone is a Natural, long lasting blend of selected sand and special acrylic binders. It creates the look and feel of real Sandstone. It is an innovative new product that will surprise you with its many advantages over traditional products.

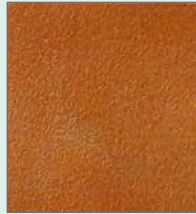

TYFO® RR Sandstone provides an ideal surface for pool surrounds, patios, driveways, feature walls, or anywhere else that requires a non-slip smart looking, unique surface.
